

## Reporting and Assessment at Chew Valley School 'At A Glance'.

At each monitoring point, your child will be awarded an attainment grade as well as scores for their attitudes towards their learning. Please see below for what these grades and scores mean.

Y11 and Y13 will receive two grades per subject on their reports:

- Current Working Grade (CWG) - based on all **current** evidence and using the teacher's professional judgement this is the grade the student is currently working at.
- Forecast Grade (FG) - based on all **current** evidence and using the teacher's professional judgement this is the Forecast Grade for end of Year 11 and Y13 if the student continues to learn in this way. Please note that this forecast is not set in stone; it can change by going up or down depending on the students efforts in that subject in between now and the summer examinations.
- Final end of year external examinations – results days in August.
- Y12 will receive a current working grade only (Current Working Grade (CWG)) - based on all **current** evidence and using the teacher's professional judgement this is the grade the student is currently working at.

Y7-10, 12 will receive one grade per subject on their reports:

Current Working Grade (CWG): - this is an age-related single grade based on Table 1 below.

**Table 1:**

Grades 7-9	Students awarded grades 7-9 demonstrate advanced knowledge and understanding of the key age-related content and skills for that subject. They are likely to be able to apply knowledge and skills to a range of problems within the subject.
Grades 4-6	Students awarded grades 4-6 are demonstrating a secure understanding of the key age-related content and skills for that subject. Students in this range will have a good understanding of concepts and knowledge and usually need to develop their ability to apply it further.
Grades 1-3	Students awarded grades 1-3 are working towards demonstrating a fully secure understanding of the key age-related knowledge and skills for that subject. They should continue to develop their retention of key content and practise how best to apply it.

Please also see the **FAQs** questions document specific to your child's year group.
