

<b>Subject</b>	<b>Maths</b>
<b>Unit/Topic</b>	Year 10 – Simultaneous Equations

<b>Key Vocabulary</b>	<b>Definition</b>
<b>Solutions</b>	Answers
<b>Infinite</b>	Unlimited
<b>Finite</b>	Limited
<b>Variable(s)</b>	Unknowns in algebra e.g $x$
<b>Equation</b>	Has an = and can be solved
<b>Substitute</b>	Swap variable for number
<b>Inverse</b>	Opposite
<b>Unknown</b>	Variable
<b>Subject</b>	Variable that and equation is equal to
<b>Rearrange</b>	Move elements of an equation by using inverse operations
<b>Simultaneous equations</b>	Two equations that have the same values for variables
<b>Intersect</b>	Where lines meet/cross
<b>Eliminate</b>	Get rid of
<b>Expression</b>	Collection of terms
<b>Linear</b>	Highest power of the variable in question is 1
