Recommended Effective Revision Techniques

How To Use This Booklet

- ✓ This booklet is to **help you get set up for effective revision**
- ✓ It has lots of **ideas and things to try** - you **do not** need to do them all
- ✓ Find a **technique that works for you and use it**
- ✓ The most important thing is you **do something – rather than nothing**
- ✓ Its important to involve other people, use your friends and family, test yourself regularly and have a break
- ✓ Revision is hard work, but **it can be fun**, it does **not need to take all your time**
- ✓ Do not over think it! Working hard at school, plus a bit extra, well planned to suit you is the **best combination!**

TECHNIQUES THAT DO NOT WORK!

- Revision techniques that **require little effort are ineffective**
- **You need to process information by meaning rather than visually**
- This requires more effort
- This means more cognitive demands- making your brain think!
- This leads to being able to recall more from your memory

AVOID

- × Highlighting lots of information
- × Cramming
- × Rereading information
- × Copying everything down word for word
- × All of the above techniques require little brain effort and you process the information visually rather than understanding what it means

cons

- This represented **44.3% of all student malpractice cases**, making it the most common form of exam malpractice.
- The figure increased from **2,140 cases in 2024**.

- A
- L
- D

- **545 students were disqualified** from some or all of their qualifications because of phone-related offences.
- **1,240 students lost marks** as a result of phone or smart device infringements.
- Across all forms of malpractice, there were **5,025 cases**, involving **4,735 students**.

"Almost half of all exam malpractice cases nationally involve mobile phones or smart devices, and over 500 students lost qualifications last year because they took a phone into an exam hall."
